File formatting

Preferred format

High resolution PDFs Acrobat V1.3 (PDF/X-1a compliant with all elements embedded). Spot colours should be converted to CMYK.

Trapping

It is essential that knockout and overprint are used when necessary to avoid overlapping of adjoining coloured areas and any text or images being omitted. Files with native transparency are not supported by our printers and must be flattened before submission (usually saving the PDF down to V1.3 will solve this).

Disclaimer

Infopro Digital cannot be held responsible for mistakes or omissions if any artwork is supplied in an unacceptable format or is not as specified above. We cannot guarantee that we will contact the client to request resubmission of the artwork in good time if such a mistake is discovered, although we will endeavour to do so.
